

# Avoiding Scams

While many job websites are safe, secure, and useful, there are also some scams that target job seekers on the Internet. Always be on the lookout for fraudulent sites or job postings, and use your best judgment before giving out your personal information.

Let's look at some common "red flags" that can alert you that a job listing may be untrustworthy.

The job ad may promise something “too good to be true,” like a very high-paying work-from-home job.

The job application asks for too much information in the application process, like bank account numbers and social security numbers

The website asks you to pay an upfront fee for a background check, deposit, or credit score.

The prospective employer is unwilling to meet in person or talk on the phone-they only want to communicate by email

The online form asks you to fill in personal information, but does not supply a secure “https” connection in the URL.

The prospective employer will not provide verifiable information about the company, like a name, address, phone number, or website.

The prospective employer promises a job before even holding an interview.

How can you avoid these scams? Let's look at some strategies and see what you think about them! Click your response, then click on submit for feedback and to move on.

**Quiz Question: To avoid a scam, you should never apply for a job online.**

(True/False, 10 points, 1 attempt permitted)

To avoid a scam, you should never apply for a job online.

True  
 False

Click submit (at the bottom right) once you have made your selection.
